

## QUALITY AND ENVIRONMENTAL POLICY

The future of MP Filtri is linked to the ability to adapt to the needs of customers. The world growing of markets obliges to challenge competitors, operating on all geographic areas of the world.

This expansion highlights the need to obtain a competitive advantage on the following aspects: QUALITY, INNOVATION, SERVICE AND PRICE.

The main goal is to improve customer service, product quality and production efficiency. The prevention of defects in the product, the reduction of variability and the inefficiencies of the processes are the first objectives to be implemented.

How to support these goals is MP Filtri strategy:

- Acquire only materials and services that have the expected quality requirements of customers;
- Actively pursue quality improvements;
- To improve the innovative capacity for the products already developed and for those of new conception, so as to be able to share the market shares and, consequently, the turnover.
- R&D investment to assure technological improvement used;
- To maintain a high level of information technology used;
- To assure company know-how and personal data protection through technical and organizational security measures to preventive information computer vulnerability and external intrusions.

**MP Filtri SPA works to create, with its industrial presence, to minimize any possible damage to the environment.**
